## HGM6110N-RM

Item number:	HGM6110N
Power supply:	DC8-35V
Product dimension:	209*166*45(mm)
Plane cutout	214*160(mm)
Operation temp	-25 to +70?
Weight:	0.56KG
Display	LCD(132*64)
Operation panel	Silicon Rubber
Language	Chinese & English
Digital Input	-
Relay out put	-
Analogue input	
AC system	-
Alternator Voltage	-
Alternator Frequency	-
Monitor Interface	-
Programmable Interface	-
DC Supply	DC(8?35)V

HGM6100N-RM is remote monitoring module designed for HGM6100N series genset controllers. With RS485 port it can realize functions of remote start/stop, data measuring, and alarm display etc. it is applicable for single remote monitoring system. It can be in the monitoring mode, realizing only monitoring, not controlling, or it can be changed over to remote control mode by local module transfer, monitored and controlled remotely.

HGM6100N-RM remote monitoring module uses micro-processing technique and 132 x64 LCD display. 8 kinds of languages are optional (Simplified Chinese, English, Spanish, Russian, Portuguese, Turkish, Polish and French) and can be changed freely. It can be widely used in all types of automatic control system with compact structure, simple connections and high reliability.

## PERFORMANCE AND CHARACTERISTICS

HGM6100N-RM has two types:

HGM6110N-RM: remote monitoring module for HGM6110N/6110CAN series controllers;

HGM6120N-RM: remote monitoring module for HGM6120N/6120CAN series controllers;
